

Cologne Bonn

SODE jetways

SODE jetways are available as an optional download. Please ensure that the SimObjectDisplayEngine module (SODE) is installed and activated before using these.

For more information on how to install and download SODE visit the developers website:

<https://sode.12bpilot.ch/>

Cologne Bonn Configuration Tool.

Included with this scenery is a configuration tool. This tool allows you to adjust certain features of the scenery to your liking. By default the “SODE Jetways” option is disabled.

To enable this option copy the “SODE” folder included with this download to this folder:

“...\Aerosoft - Cologne-Bonn Airport\Configuration Tool\Library”

The Library folder should now contain these folders:

 Photoscenery	8/31/2018 5:09 AM	File folder
 Scenery	10/22/2018 2:47 PM	File folder
 SODE	10/26/2018 11:24 ...	File folder
 Texture	10/25/2018 6:34 PM	File folder

When restarting the Configuration Tool The “SODE Jetways” option will now be activated.
